The FB45 locking system thinks big

The strongest and most durable in the Fawic range, this locking system can withstand substantial abuse. During transport, the boxes equipped with this system are thoroughly put to the test and come through with flying colours. The modular panels are up to 45 mm thick and afford your products the utmost protection. The system protects against dust and splash water.

Secure transport

Boxes with the Fawic patented FB45 locking system are extremely strong and are, without a doubt, the only answer for bulky, critical shipments such as high-tech equipment, machines and capital goods. The 45 mm thick sandwich panels are constructed with lightweight materials and have high values of insulation and protection. The panels can be easily sealed using the stainless steel locking components. Panels and box interiors are completely adaptable to the type of shipment.

Return on investment

All Fawic boxes can be completely disassembled and the patented FB45 locking system allows boxes to be quickly assembled and disassembled. The lightweight materials can be completely collapsed and sent back to the consignor using minimal transport space and then reused. The boxes can also be effortlessly used as temporary storage. Parts for all of the types of boxes are interchangeable and always in stock. These boxes will last you for years.

Applications

Large-volume shipments. The semiconductor industry, capital goods, the medical industry, art, aviation and aeronautics, and defence are sectors where boxes with the FB45 locking system are already being used.

Technical specifications

- Panel thickness: up to 45 mm •
- Dimensions: product-specific •
- Closing force locking devices: approx. 600 kg each •
- Form-fit locking system •
- Protection against dust and splash water •
- Insulating value depends on panel
- Can be completely disassembled
- Goods can be fixed in place
- Can be equipped with: lifting rings, handles, document holder, buffer ring
